Environment Impact Chemical Substance Lists

Effective January 1, 2025 (2.5 edition)

NIKON-TRIMBLE CO., LTD.

Table of Contents

I. Procurement Items

I -1. Prohibited Chemical Substances

The following table shows the chemical substances prohibited to be contained in procured items (finished products, parts and materials, packaging materials) and their maximum allowable concentration (threshold values). If multiple thresholds are written in a single threshold field, all of them must be satisfied.

No.	Substance/ Category	Key Legal and Regulatory or Industry Standard	Application(s)	Threshold Level	Examples of Use
1	**Cadmium/cadmium Compounds**	・RoHS Directive 2011/65/EU ・ANNEX XVII Entry 23 of REACH Regulation (EC) No 1907/2006	All except the below applications	0.01% by weight (100 ppm) of cadmium in homogeneous material	Pigment, anti-corrosion surface treatment, optical glass, stabilizer, plating, fluorescent, electrode, solder, electric contact, contact point, zinc plating plastic stabilizer
		・EU Directive 94/62/EC on Packaging and Packaging Waste ・US State Toxics in Packaging (TPCH Model Legislation)	Packaging materials	・Intentionally added(1) ・0.01% by weight (100 ppm) of the sum of cadmium, mercury, lead & chromium VI in homogeneous material	Pigment, paint, plastic stabilizer
		ANNEX XVII Entry 72(12) of REACH Regulation (EC) No 1907/2006	・Clothing or related accessories ・Textiles ・Footwear	0.0001% by weight (1 ppm) of cadmium in homogeneous material	Pigment, dye
		・EU Batteries Regulation (EU)2023/1542 ・Korea “Quality Management and Industrial Products Safety Management Enforcement Ordinances” ・Taiwan Waste Disposal Act (Regulation on heavy metal)	Zinc–carbon batteries, alkaline manganese batteries, and nickel–metal hydride (Ni-MH) secondary batteries (except Button cells)	0.001% by weight (10ppm) of cadmium in a battery	
			Batteries, other than the batteries listed above (except for emergency and alarm systems, including emergency lighting, and medical equipment)	0.002% by weight (20ppm) of cadmium in a battery	
		For exemptions under the RoHS Directive (2011/65/EU), please refer to Annex 1 "Applications exempted from the RoHS Directive Annex III" and Annex 2 "Applications exempted from the RoHS Directive Annex IV". In principle, the prohibited dates of delivery to Nikon-Trimble will be six months before the expiration dates of exemption. Representative examples of relevant substance

Representative examples of relevant substance

Substance name	CAS No.
Undecafluorohexanoic acid	307-24-4
Sodium undecafluorohexanoate	2923-26-4
Ammonium undecafluorohexanoate	21615-47-4

Notes:

(1) Intentionally added:
Intentionally added means that the corresponding substance or compound including the corresponding substance is intentionally added during manufacturing process, etc., irrespective of quantity. Ordinary impurities do not fall under this category. The substance, for which “Intentionally added” is written in its threshold field, must not be intentionally added.

(2) Regulatory thresholds for substances in these applications are based on emission or exposure limits rather than the concentration in the product. The regulatory limit is:

Radioactive substances -a dose rate exceeding 1 μSv h–1 at a distance of 0,1 m

Because emission and exposure levels cannot be derived from actual concentration, a threshold level of “intentionally added” is indicated for reporting. Suppliers may choose to report a default concentration of 0.1% by weight in the product for these substances, in lieu of determining the exact concentrations in their products, to indicate that the substance is known to be present in their product, as the actual concentration in the product is not informative for regulatory compliance assessment.

(3) The European Community's ban applies to azocolourants and azodyes that by reductive cleavage of azo groups may release one of the 22 aromatic amines listed. The threshold level given applies to these amines, not to the azocolourants and azodyes.

(4) HBCD is also referred to as HBCDD. HBCD and HBCDD are the same substance.

(5) Regulatory thresholds for substances in these applications are based on emission limits.
- ・Hardwood plywood (made with a veneer core or a composite core) － 0.05 ppm
- ・Medium-density fiberboard (MDF) － 0.11ppm
- ・Thin MDF － 0.13ppm
- ・Particleboard － 0.09ppm

(6) However, the use of arsenic is conditionally permitted when their substitutions are not available currently because of material technology and they are technically and scientifically essential to maintain the optical performance required in product designing.

(7) PFOA related substances refer to substances (including its salts and polymers) having a linear or branched perfluoroheptyl group with the formula C7F15- or perfluorooctyl group with the formula C8F17- , as one of the structural elements. The following substances are excluded.

- C8F17-X, where X= F, Cl, Br.
- Fluoropolymers that are covered by CF3[CF2] n-R', where R'=any group, n> 16;
- Perfluoroalkyl carboxylic acids (including their salts, esters, halides and anhydrides) with ≥ 8 perfluorinated carbons;
- Perfluoroalkane sulfonic acids and perfluoro phosphonic acids (including their salts, esters, halides and anhydrides) with ≥ 9 perfluorinated carbons;
- Perfluorooctane sulfonic acid and its derivatives (PFOS), as listed in Annex I of POPs Reguration.

(8) When PFOAs are contained in mixtures applied to the article, we have determined that the denominator for calculating the concentration may be the total mass of articles and mixtures (after volatilization / after reaction) with reference to "Guidance on requirements for substances in articles" issued by ECHA.
However, this interpretation may be changed due to revisions of laws and regulations.

(9) For equipments used to manufacture semi-conductors, latex printing inks, and medical devices other than implantable medical devices, which were allowed to be excluded for a certain period of time, the exclusion deadline has changed as follows due to the shift from REACH Regulation to POPs Regulation.
- latex printing inks; until 3 Dec 2020
- medical devices other than implantable ones, within the scope of Regulation (EU) 2017/745; until 3 Dec 2020.
- equipments used to manufacture semi-conductors; no exclusion

(10) This PBDEs refer to tetra BDE (tetrabromodiphenyl ether), penta BDE, hexa BDE, hepta BDE, and deca BDE.

(11) "ANNEX XVII Entry 63 of REACH Regulation (EC) No 1907/2006" shall not apply to the following articles. (Refer to the Official Journal of the European Union / COMMISSION REGULATION (EU) 2015/628 for more information.)
(1) Articles placed on the market for the first time before 1 June 2016
(2) Articles within the scope of Directive 2011/65/EU of the European Parliament and of the Council

(12) "ANNEX XVII Entry 72 of REACH Regulation (EC) No 1907/2006" shall not apply to the following uses.
(1) Clothing, related accessories or footwear, or parts of clothing, related accessories or footwear, made exclusively of natural leather, fur or hide
(2) Non-textile fasteners and non-textile decorative attachments
(3) Second-hand clothing, related accessories, textiles other than clothing or footwear
(4) Wall-to-wall carpets and textile floor coverings for indoor use, rugs and runners
(5) Personal protective equipment within the scope of Regulation (EU) 2016/425 and medical devices within the scope of Regulation (EU) 2017/74
(6) Disposable textiles. 'Disposable textiles' means textiles that are designed to be used only once or for a limited time and are not intended for subsequent use for the same or a similar purpose.

(13) No.35 C9-C14 PFCAs, their salts and C9-C14 PFCA-related substances cover the following substances.
(1) Linear and branched perfluorocarboxylic acids of the formula CnF2n +1-C(= O)OH where n = 8, 9, 10, 11, 12, or 13 (C9-C14 PFCAs), including their salts, and any combinations.
(2) Any C9-C14 PFCA-related substance having a perfluoro group with the formula CnF2n +1- directly attached to another carbon atom, where n = 8, 9, 10, 11, 12, or 13, including their salts and any combinations.
(3) Any C9-C14 PFCA-related substance having a perfluoro group with the formula CnF2n +1- that it is not directly attached to another carbon atom, where n = 9, 10, 11, 12, 13 or 14 as one of the structural elements, including their salts and any combinations. The following substances are excluded.
-CnF2n +1-X, where X = F, Cl, or Br
where n = 9, 10, 11, 12, 13 or 14, including any combinations thereof,
-CnF2n +1-C(= O)OX' where n> 13 and X'=any group, including salts.

(14) "Textile articles" in No.42 means refers to apparel, accessories, backpacks, handbags, carrying cases, straps, and other products made entirely or partially of textiles. Products and packaging materials that use textiles such as leather, non-woven fabrics, sponges, etc. are also included in "textile articles".

(15) No.43 PFHxA, its salts and PFHxA-related substances cover the substances having a linear or branched perfluoropentyl group with the formula C5F11- directly attached to another carbon atom as one of the structural elements or having a linear or branched perfluorohexyl group with the formula C6F13-. The following substances are excluded.
(a) C6F14 (Perfluorohexane/ Cas No.:355-42-0)
(b) C6F13-C(=O)OH (Perfluoroheptane/ Cas No.:375-85-9) , C6F13-C(=O)O-X' or C6F13-CF2-X' (where X' = any group, including salts).
(c) Any substance having a perfluoroalkyl group C6F13 -directly attached to an oxygen atom at one of the non-terminal carbon atoms.

Annex 1. Applications exempted from the RoHS Directive Annex III

The following table lists the applications exempted from the RoHS Directive as of October 1, 2024.
As a principle, these applications are exempted from Section I-1, “Prohibited Chemical Substances”.
In principle, the prohibited dates of delivery to Nikon-Trimble will be six months before the expiration dates of exemption.
Please note that the Annex of RoHS Directive is subject to continual revision, make sure to check the European Commission website for the latest information.

Notes:

(1) Expiration date in Category 11 is in principle “July 21, 2024”, five years after the start of application.
And the expiration date in the newly added No.45 is “April 20,2026”, and No.46 is May 28, 2028.

(2) The expiration date of exemption has already filed, and the European Commission is under the discussion of exemption renewal or will discuss from now on, it is "Pending".

(3) Under extension, but Nikon-Trimble has set the following exclusion deadlines on our own initiative.

6(a): July 2023
6(b): April 2023
6(c): July2025

Annex 2. Applications exempted from the RoHS Directive Annex IV

The following table lists the applications (cat.8: medical device, cat.9: monitoring and control instruments) exempted from the RoHS Directive as of October 1, 2024. As a principle, these applications are exempted from Section I-1, “Prohibited Chemical Substances”. In principle, the prohibited dates of delivery to Nikon-Trimble will be six months before the expiration dates of exemption.
Please note that the Annex of RoHS Directive is subject to continual revision, make sure to check the European Commission website for the latest information.

I-2. Controlled Chemical Substances

Sections I-2-(1) and I-2-(2) show the chemical substances that must be appropriately managed when procured Items (finished products, parts and materials, packaging materials) contain them.
For these chemical substances, suppliers are required to maintain a system to provide information on the type and amount used, part of the product where used, etc., immediately upon request of Nikon. Note that the legal and regulatory, thresholds, and others are listed for the purpose of reference in Section I-2-(1).

Notes:

(1) A laminated printed wiring board refers to the layered board materials excluding surface finishing and components

(2) Intentionally added: It means that the corresponding substance or compound including the corresponding substance is intentionally added during manufacturing process, etc., irrespective of quantity.
Ordinary impurities do not fall under this category.
The substance, for which “Intentionally added” is written in its threshold field, must not be intentionally added.

(3) Regulatory thresholds for substances in these applications are based on emission or exposure limits rather than on the concentration in the product. The regulatory limits are:
・Nickel released from the parts coming into direct and prolonged contact with the skin ： 0,5 μg/cm^2/week
(Based on DIN EN 1811)
Because emission and exposure levels cannot be derived from actual concentrations, a threshold level of “intentionally added” is indicated for reporting. Suppliers may choose to report a default concentration of 0.1% by weight in the product for these substances, in lieu of determining the exact concentrations in their products, to indicate that the substance is known to be present in their product, as the actual concentration in the product is not informative for regulatory compliance assessment.

(4) Nickel must be reported in certain regulated applications where it is likely to result in prolonged skin exposure (e.g., an outer enclosure for a portable electronic product designed to be carried). Use of nickel or nickel contained in components and parts designed to be located inside the outer enclosure of a product need not be reported.

(5) According to the judgement of European Court of Justice on September 2015, in principle the denominator of the threshold (control value) would be a part or material constituting the product.

(6) CAS number of these substances is not disclosed due to CBI (confidential business information).

I-2-(2) SVHCs of REACH Regulation

SVHCs of REACH Regulation are subject to continual addition, and suppliers should be responsible for always ensuring that they refer to the latest version. The following table lists the SVHCs as of November 10 , 2024. Refer to the latest version on the ECHA website below.

https://echa.europa.eu/candidate-list-table

Besides, some of SVHCs are defined to be the “prohibited chemical substances”. Refer to the list of Section I-1. “Prohibited Chemical Substances” for the substances marked as “PCS” in the “Remarks” column of the following list.

Notes:

(1) Alkanes, C10-13, chloro (Short Chain Chlorinated Paraffins) is abbreviated to SCCPs.
Here, the short chain corresponds to carbon number 10 to 13 (as the medium chain and long chain correspond to carbon number 14 to 19 and 20 to 30, respectively). SCCPs are a persistent and high-bioaccumulative substance used for various purposes because it has flame retardant properties, plasticity, lubricating properties in metallic processing, and hydrophobicity.

(4) Refractory Ceramic Fibers, Zirconia Aluminiumsilicate are fibers covered by index number 650-017-00-8 in Annex VI, part 3, table 3.1 of Regulation (EC) No 1272/2008 of the European Parliament and of the Council of December 16, 2008 on classification, labelling and packaging of substances and mixtures, and fulfil the three following conditions:
a) oxides of aluminium and silicon are the main components present (in the fibers) within variable concentration ranges
b) fibers have a length weighted geometric mean diameter less two standard geometric errors of 6 or less micrometres (μm)
c) alkaline oxide and alkali earth oxide (Na2O+K2O+CaO+MgO+BaO) content less or equal to 18% by weight

(3) Refractory Ceramic Fibers, Aluminosilicate are fibers covered by index number 650-017-00-8 in Annex VI, part 3, table 3.1 of Regulation (EC) No 1272/2008 of the European Parliament and of the Council of December 16, 2008 on classification, labelling and packaging of substances and mixtures, and fulfil the three following conditions:
a) oxides of aluminium, silicon and zirconium are the main components present (in the fibers) within variable concentration ranges
b) fibers have a length weighted geometric mean diameter less two standard geometric errors of 6 or less micrometres (μm)
c) alkaline oxide and alkali earth oxide (Na2O+K2O+CaO+MgO+BaO) content less or equal to 18% by weight

(4) Those substances are identified as SVHCs in case [with ≧0.1% of Michler's ketone (EC No.202-027-5) or Michler's base（EC No.202-959-2）].

(5) This substance is identified as a SVHC in the following case:
with lead (Pb) content above the applicable generic concentration limit for 'toxicity for reproduction' Repr. 1A (CLP) or category 1 (DSD); the substance is a member of the group entry of lead compounds, with index number 082-001-00-6 in Regulation (EC) No 1272/2008.

(6) Those substances are substances with a linear and/or branched alkyl chain with a carbon number of 9 covalently bound in position 4 to phenol, ethoxylated covering UVCB- and well-defined substances, polymers and homologues, which include any of the individual isomers and/or combinations thereof.

(7) According to the REACH regulation, glass and ceramics are one substance, not a mixture of several substances. Even if SVHCs are used as raw materials, the individual raw materials and the glass as a melt reaction product are different substances, so there is no need to communicate information on individual raw materials (SVHCs).

Revision History		
Date	**Edition**	**Description**
April 1, 2020	2.0	-Changed contents of I -1- (1) Prohibited Chemical Substances (No.11,13,14,20,21,24). -Updated the expiration dates in I -1- (1) Annex 1" Applications exempted from the RoHS Directive Annex III" and added No.42-44. -Updated the expiration dates in I -1- (1) Annex 2" Applications exempted from the RoHS Directive Annex IV ". -Added I -2- (1) Controlled Chemical Substances No.11 “Perfluorohexane-1-sulphonicacid (PFHxS), its salts and PFHxS-related substances”. -Added 4 substances of 21st SVHC and 4 substances of 22nd SVHC to “I -2- (2) SVHCs of REACH Regulation”.
November 1, 2020	2.1	-Changed contents of I -1- (1) Prohibited Chemical Substances (No.6,24,25,27,29). -Added I -1- (1) Prohibited Chemical Substances No30 “CMR substances listed in Annex XVII of REACH Regulation (Excluding substances already listed as prohibited chemical substances)”. -Updated the expiration dates in I -1- (1) Annex 1" Applications exempted from the RoHS Directive Annex III". -Updated the expiration dates in I -1- (1) Annex 2" Applications exempted from the RoHS Directive Annex IV " and added No43-44. -Added Perfluorohexanoic acid (PFHxA), its salts and PFHxA-related substances” to I -2- (1) Controlled Chemical Substances No.12 and Ⅱ-2-(3) “Others” No.3. -Added 4 substances of 23th SVHC to “I -2- (2) SVHCs of REACH Regulation”
November 1, 2021	2.2	-Revised and added contents of I -1.Prohibited Chemical Substances (No.1-4,6,24). -Added No.31-35 of I -1.Prohibited Chemical Substances. -Updated the expiration dates in I -1. Annex 1" Applications exempted from the RoHS Directive Annex III". -Updated the expiration dates in I -1. Annex 2" Applications exempted from the RoHS Directive Annex IV " -Deleted I-1-(2) Prohibited Chemical Substances in Batteries. -Added No.13-15 of I -2- (1) Controlled Chemical Substances. -Added 2 substances of 24th SVHC and 8 substances of 25th SVHC in “I -2- (2) SVHCs of REACH Regulation”.
November 1,2022	2.3	-Revised and added contents of I -1.Prohibited Chemical Substances (No.3,24-27,31). -Added No36-37 of I -1.Prohibited Chemical Substances. -Updated the expiration dates in I -1. Annex 1" Applications exempted from the RoHS Directive Annex III". -Updated the expiration dates in I -1. Annex 2" Applications exempted from the RoHS Directive Annex IV " -Deleted No.11 of I -2- (1) Controlled Chemical Substances. -Added No.15-19 of I -2- (1) Controlled Chemical Substances. -Added 4 substances of 26th SVHC and 1 substance of 27th SVHC in “I -2- (2) SVHCs of REACH Regulation”.
December 1 ,2023	2. 4	-Revised and added contents of I -1. Prohibited Chemical Substances (No.1-4,26,31,35,36,37). -Added No.38-42 of I -1. Prohibited Chemical Substances. -Updated the expiration dates in I -1. Annex 1" Applications exempted from the RoHS Directive Annex III". -Updated the expiration dates in I -1. Annex 2" Applications exempted from the RoHS Directive Annex IV " -Deleted No.12,17,19 of I -2- (1) Controlled Chemical Substances. -Added No.17,18 of I -2- (1) Controlled Chemical Substances. -Added 9 substances of 28th SVHC and 2 substances of 29th SVHC in “I -2- (2) SVHCs of REACH Regulation”.

January 1 ,2025	2.5	-Revised and added contents of I -1. Prohibited Chemical Substances (No.6,9,10,12,13,20,22,23,24,29,31,32,34,35,36,37,40,41). -Added No.43 of I -1. Prohibited Chemical Substances. -Updated the expiration dates in I -1. Annex 1" Applications exempted from the RoHS Directive Annex III". -Updated the expiration dates in I -1. Annex 2" Applications exempted from the RoHS Directive Annex IV " -Deleted No.11 of I -2- (1) Controlled Chemical Substances and revised number. -Added No.18 of I -2- (1) Controlled Chemical Substances. -Added 7 substances of I -2- (2) SVHCs of REACH Regulation.
